

# State NRM Program Strategic Priority Projects 2012

## Fertiliser partnership agreement projects

| Proponent                             | Project  | Funding     |
|---------------------------------------|--|-------------|
| Department of Agriculture and Food WA | Whole farm nutrient mapping                                    | \$1 000 000 |
| Department of Water                   | Implementing the Vasse-Wonnerup Water Quality Improvement Plan | \$350 000   |
|                                       | Soil amendment trials  | \$300 000   |
| Swan River Trust                      | Swan-Canning water quality improvement                         | \$1 500 000 |

## Weed and pest management projects

| Proponent                     | Project                            | Funding     |
|-------------------------------|------------------------------------|-------------|
| Rangelands NRM                | Kimberley rubber vine eradication  | \$1 000 000 |
| South Coast NRM               | Starling control                   | \$320 000   |
| South West Catchments Council | Feral pig control in south west WA | \$900 000   |
| Wheatbelt NRM                 | Coordinated predator control       | \$350 000   |

## Land management projects

| Proponent                                | Project   | Funding   |
|--|---|-----------|
| Northern Agricultural Catchments Council | Pilot to test carbon driven solutions to salinity | \$330 000 |
| Rangelands NRM                           | Sustainable productivity in the rangelands        | \$145 000 |

## Biodiversity Conservation projects

| Proponent   | Project  | Funding     |
|---|--|-------------|
| Department of Environment and Conservation                  | Critically endangered flora recovery                 | \$1 610 000 |
|   | Dibbler conservation                                 | \$350 000   |
|   | Western ground parrot conservation                   | \$600 000   |
|   | Western swamp tortoise conservation                  | \$500 000   |
| Department of Fisheries                                     | Demersal fish stock conservation on the south coast  | \$850 000   |
|   | Freshwater fish conservation                         | \$850 000   |
| Northern Agricultural Catchments Council and Rangelands NRM | Biodiversity Links: mid-west and southern rangelands | \$300 000   |
| South Coast NRM   | Dieback management                                   | \$3 000 000 |
| Western Australian Local Government Association             | Local government biodiversity conservation           | \$500 000   |

## Other projects

| Proponent                             | Project   | Funding    |
|---------------------------------------|---|------------|
| Department of Agriculture and Food WA | Aboriginal engagement in natural resource management        | \$500 000* |
|                                       | Forming Recognised Biosecurity Groups in agricultural areas | \$700 000  |

\* This project was approved along with others listed here but is not included in the media release dated 24.07.12
